

CANDLE CARE

We want you to experience the maximum enjoyment and pleasure from our candles. It is very important that you burn candles responsibly to ensure their safe use.

■ **ALWAYS KEEP A BURNING CANDLE WITHIN SIGHT.**

Extinguish all candles when leaving a room or before going to sleep.

■ **KEEP CANDLES OUT OF THE REACH OF CHILDREN AND PETS.**

Don't place lighted candles where they might be knocked over by children or pets.

■ **PLACE BURNING CANDLES AT LEAST 10CMS APART.**

This ensures they won't melt one another, or create drafts that can cause the candles to flare, or the glass to crack.

■ **NEVER BURN A CANDLE ON OR NEAR ANYTHING THAT CAN CATCH FIRE.**

Place candles away from drapes, bedding, carpets, books, paper, flammable decorations, etc.

Candles should be burned away from other sources of heat such as television sets and direct sunlight.

■ **TRIM CANDLEWICKS TO ½" EACH TIME BEFORE BURNING.**

Long or crooked wicks can cause uneven burning, dripping and/or excessive smoking.

■ **ALWAYS USE A CANDLEHOLDER SPECIFICALLY DESIGNED FOR CANDLE USE.**

The holder should be heat resistant, sturdy and large enough to contain drips or melted wax. Be sure the candleholder is placed on a stable, heat-resistant surface. This will also help prevent possible heat damage to underlying surfaces and prevent glass containers from cracking or breaking.

■ **KEEP THE WAX POOL FREE OF WICK TRIMMINGS, MATCHES AND DEBRIS**

Debris in wax can cause excessive flames and/or smoke.

■ **ALWAYS FOLLOW THE MANUFACTURERS USE AND SAFETY INSTRUCTIONS CAREFULLY.**

Don't burn a candle longer than the manufacturers recommends – no candle should be burned for longer than 4 hours max.

■ **KEEP BURNING CANDLES AWAY FROM DRAFTS, VENTS, CEILING FANS & AIR CURRENTS.**

This will help prevent rapid, uneven burning, and avoid flame flare-ups and sooting. Drafts can also blow lightweight curtains or papers into the flame where they could catch fire.

■ **DON'T BURN A CANDLE ALL THE WAY DOWN.**

Extinguish the flame if it comes too close to the holder or container. For a margin of safety, discontinue burning a candle when 2 inches of wax remains or 1 inch if in a container – burning a candle all the way down may cause the glass to crack.

■ **EXTINGUISH A CANDLE IF IT FICKERS REPEATEDLY, SMOKES, OR THE FLAME BECOMES TOO HIGH.**

The candle isn't burning properly. Let it cool, trim the wick, check for drafts and then re-light. Use a snuffer to extinguish a candle. It's the safest way to prevent hot wax splatters.
